Landscape and Portrait Mode

Use video wall displays with landscape or portrait mode. Vestel's 24/7 professional displays not only allow for installation in portrait mode, but also for additional display protection. The displays' Pixel Shifting feature reduces the risk of any on-screen image sticking.

White Color Calibration

For managing color uniformity with highest performance, color calibration has been made available for on-site maintenance. This results in the most clear color and minimized color distortion.

Higher Visibility
