Closed Production Area

Export Leader of Turkey with
$ 2,3 Billion

3.762.000
Device Production Capacity

$ 3,5 Billion
Turnover

Vestel City, which comprises nine plants located in Manisa, is amongst the biggest industrial complexes in the world.

Comprised of 25 companies, Vestel Group is a multi-industry manufacturer that operates in consumer electronics, major domestic appliances, professional displays, automotive and battery solutions, and EV Chargers. Testimony to the global importance of Zorlu Holding across multiple technology sectors, Vestel is not only thriving at home in Türkiye, but also through a further 11 subsidiaries that have been set up in various other parts of the world. Thanks to its renowned manufacturing and R&D complex, Vestel exports to more than 160 countries and keeps its position as a global player.

Vestel is one of the ten biggest major domestic appliances manufacturers in Europe, with its new product development ability, flexibility in production, and fast response to clients' demands.

Operating with an annual capacity of 4.7 million units, the company's two refrigerator plants produce a variety of models ranging from french door, no-frost, combi, double door, single door, to tabletop fridges and freezers, as well as built-in models.

Achieving similar success with washing machines, Vestel is able to produce 3.8 million units a year, with large models range from 4 kg to 12 kg drum capacities washer and 7kg/5kg, 8kg/6kg, 9kg/6kg,10kg/6kg drum capacities washer/dryer. Vestel's product range also includes built-in washer and washer/dryer with drum capacities of 7 kg, 8 kg and 7/5 kg.

Vestel tumble dryers have annual capacity of 1.1 million units, with models ranking from 7 kg to 12 kg capacities. The group is capable of producing both condenser and heat pump type of tumble dryers with high efficiency.

The plant for cooking appliances operates with an annual capacity of 2.7 million units, producing free-standing cookers, built-in hobs and 90x60, 100x60 and double ovens.

The dishwasher appliances product range includes freestanding, semi&fully integrated and full door platforms with 45 cm, 60 cm, Tall Tub and Deep tall tub dimensional options. New Dishwasher plant construction have been completed and serial production started at the end of 2023. The dishwasher plant has the capacity to produce 2.5 million units in a year now. The new dishwasher plant is able to produce over 4 million units in a year with additional investments.

In addition, the air conditioner factory is capable of producing 530K sets of split-type models. And also the water heater factory has the capacity to produce 355K water heaters annually.

R&D facilities located in Türkiye, the UK, and China employ the highest caliber engineers to develop hardware and software solutions that provide clients with world-class quality products.

Vestel Mobility factory located in the free trade zone of Izmir, has a special R&D team for manufacturing and testing batteries and EV Chargers, which is also exporting these goods to Europe with zero customs tax.

Vestel has proven its success in product design by receiving the most prestigious design awards every year from well-known industrial design organizations for a variety of products.

Vestel Trade, the company responsible for the marketing and sales of Vestel products overseas, exports 75% percent of its production under leading Japanese and European brands to 160+ countries.

Vestel appeals to different consumer tastes in 160+ countries with its wide range of products, which reflects its competencies in technological development, design and product customization. Accounting for 90% of Türkiye's TV exports and 35% of the nation's white goods exports, Vestel has been an unwavering export leader in the Turkish electronics sector for the past 25 years.

For a sustainable future and transition to an economy based on net zero emissions, Vestel triggers transformation across the entire value chain. Leveraging the power of Industry 4.0 and automation to support the reduction of energy consumption through operational improvements and innovative products, Vestel implements circular models to improve resource efficiency in production and reduce our environmental impact from products.

Vestel aims to reach net zero emissions by 2050, first in its own operations and then in its entire value chain. Vestel is working on a decarbonization plan as part of its commitment to set Science Based Targets (SBTi).

1

TWINJET TECHNOLOGY

Twinjet technology is a revolutionary unique jet feature of Vestel washing machines.

2

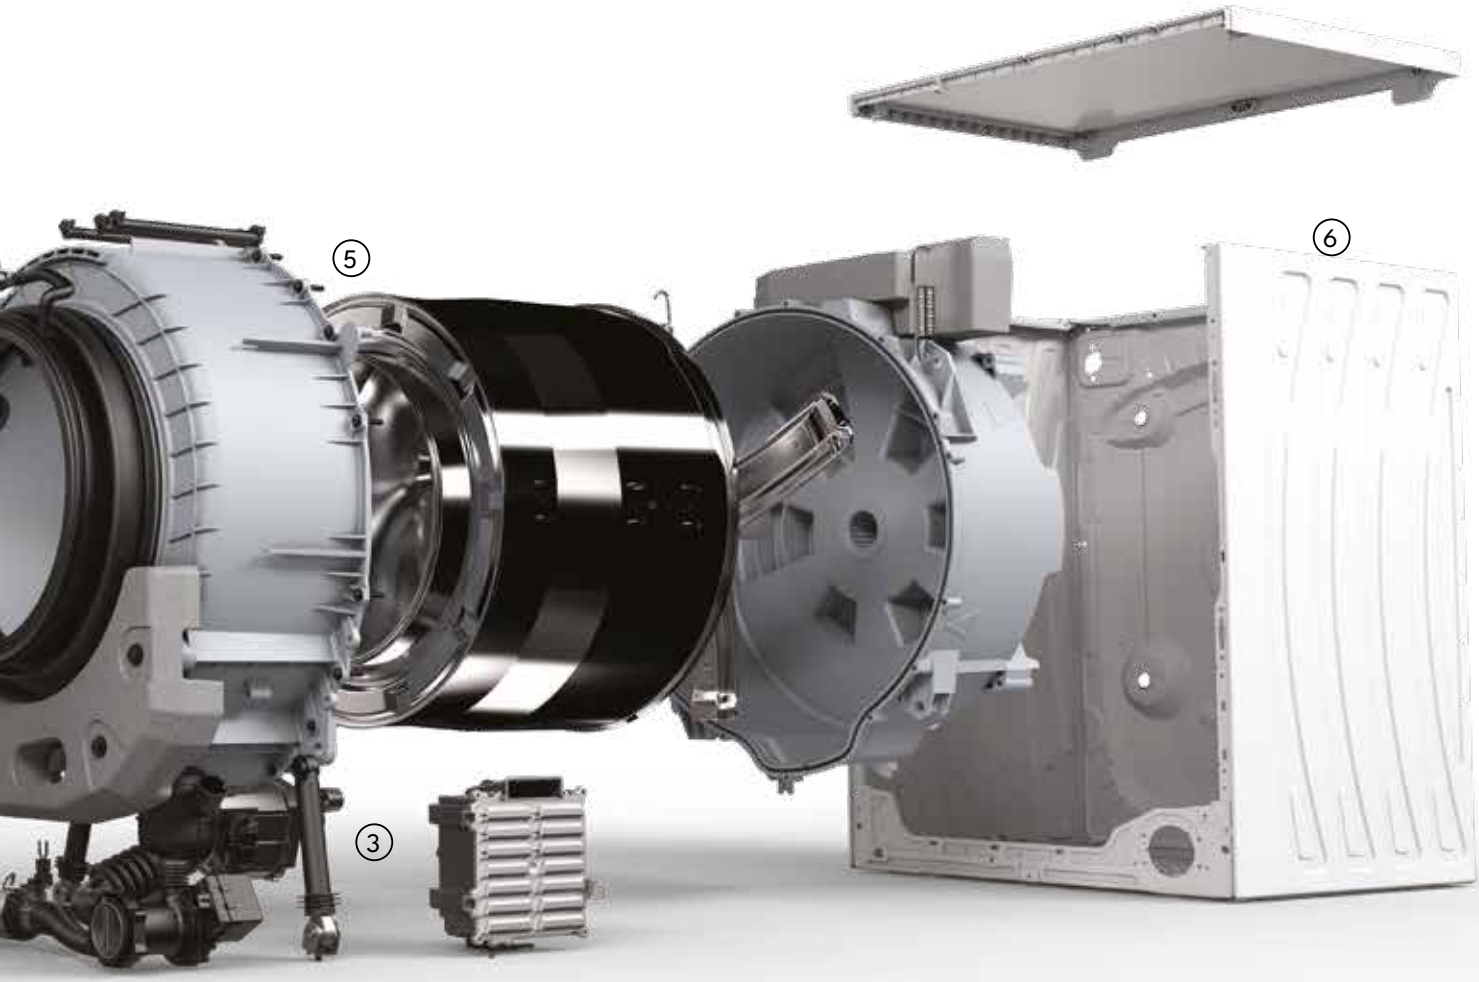

GIANT DOOR

The largest of the door selections; the Giant Door has a 510mm diameter, PC cover, floating hook design and selenoid feature to achieve a cutting edge aesthetic and high end look.

3

QUIET BLDC MOTOR

The magnetic BLDC motor reduces the sound level during washing and extraction up to 5 dB and ensures a decrease in loudness for more than “twofold. During the extraction in high speed, it works in a higher performance and a spectacular silence. Thus, you are able to wash your laundry even very late at night.

4

JOG DIAL

Program selection with user-friendly and aesthetic program selection knob becomes fast and effortless. Thanks to the LED light around the knob and within the entire programs, the program selection can clearly be seen.

5

PEARL DRUM

New drum pattern provides greater protection for your washing. It provides gentle washing for your clothes.

6

BOOMERANG CABINET

Many points and forms have been redesigned and strengthened to increase rigidity. The decreased vibration level and increased stability.

Features

Twin Jet System

Better washing performance is achieved by directly injecting water with detergent using a recirculation system and two nozzles connected to it.

Anti Bacterial 95˚C

Provides very good washing quality at high temperatures for heavily soiled laundry, and includes a machine “hygiene” feature since you can clean the drum spotlessly.

Hot & Cold (Optional)

When the water inlet is connected to a hot water supply, it saves electricity and prolongs the washing machine’s lifetime, as the internal water heater won’t need to function much.

Stain Level Selection

Select from 3 stain levels for T3 version washer models. Take control of the washing machine’s power and adjust it according to your needs.

Super Rapid 12 Minutes

Ideal for clothes worn once that you need in a hurry.

Daily 60˚C 60’

For your cotton clothes in a short time, like 60 minutes.

Anti Allergic (Optional)

Applies a special rinsing method to thoroughly remove detergent residues.

Overflow Protection

The overflow protection system detects potential problems with water supply that may cause overflowing. If a problem is detected, the drain pump automatically turns on.

Liquid Detergent Reservoir

Efficiently use liquid detergent with the built-in reservoir.

Easy Ironing

With the help of this function, clothes come out less wrinkled.

No Spin

The spinning process is omitted for very sensitive clothes.

Delay Timer

Enables you to postpone the starting time of the washing process.

60 Hz

Washing machines can also be prepared to support 60 Hz (110-220-240V) versions.

Buzzer

The optional buzzer feature sounds when the washing machine finishes its cycle and the laundry is ready to be taken out.

Child Lock

Prevents unauthorized changes to the control panel settings while the machine is in operation.

Door Lock Indicator

The system indicates the status of the washing machine door.

Nickel Diffusion Heater

The nickel diffusion heater allows the machine to have a longer lifetime by avoiding calcareous build-up on the heating element.

Extra Rinse

Additional rinsing is done in addition to standard rinsing processes, recommended for clothes that will be worn on sensitive skin.

Solenoid Door Lock

The solenoid door lock function detects the status of the door and alerts you if it is open, closed, or locked.

Prewash

Recommended when an additional washing process is needed for heavily soiled laundry.

Cold Wash

Ideal for washing slightly dirty clothes with tap water.

Half Load

When the machine is half-loaded, energy consumption is automatically reduced by up to 50%. Additionally, water consumption and program duration are dramatically decreased because the machine can detect whether it is half-loaded or not. This feature is included in all models.

Unbalance Control System

In case of unevenly distributed laundry, the unbalance control system redistributes the load inside the drum and adjusts the spin speed to achieve optimum spinning efficiency.

Rinse Hold

Recommended when clothes cannot be taken out immediately after the end of the washing cycle to reduce wrinkles.

Plus Water

Washing is done with an extra amount of water, decreasing the friction between clothes. Recommended for sensitive clothes and those you desire to be rinsed very well.

Allergy Safe

Vestel Washing Machine is effective for allergens and bacteria types with specific program with the “Allergy Safe” technology.

Soak

Leaves clothes in water with detergent for a certain period of time after the machine takes in the initial water and starts the washing process. Recommended for very dirty clothes.

Anti-Allergic (Only RI Version)

Recommended for baby laundry and sensitive skin. A special rinsing method is applied to thoroughly remove detergent residues.

Failure Detection System

The user can easily detect a failure on the washing machine with the help of blinking error signals on the control panel buttons.

Floating Hook Design

Giant Door uses floating hook design; there will be no need for a handle to open the door. There will be improvement over the closing feeling. Due to the Solenoid feature inside the door lock, door will be opened as soon as the program finishes or the moment which the customer wants (if the water level and temperature is appropriate).

Twinjet technology

Twinjet technology enables additional waterjets directly onto the laundry.

Washing Performance
Nozzles directly injects water & detergent mix onto laundry: penetrates better with laundry.

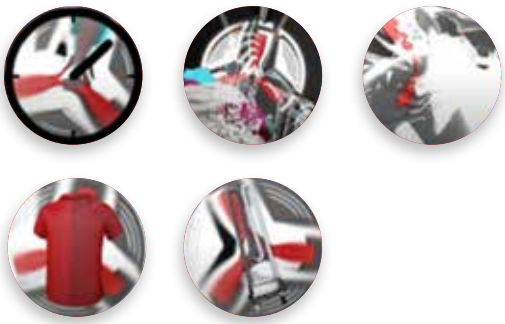

Rinsing Performance
Lower water & detergent mix.

Program Duration
Fastest program lasts 12 minutes with TJ(15 minutes without TJ)

Hydro Boost

Mixture of the water and detergent is sprayed onto laundry from 20 different points in the drum.

As a result of powerful sprays from multiple locations water/detergent mixture penetrates to the fabric in a much more efficient way.

Dose On

Easy to Use
No need to add detergent and softener before each washing period.

High Capacity
20 washes with one filling.

Sensitive Control
Sensitive detergent / softener levelling according to the selected program and detected amount of the laundry.

Dose-On delivers the perfect amount of detergent and fabric softener every time, ensuring superior cleaning and fabric care. Say goodbye to guesswork and detergent residue while extending the life of your clothes. Enjoy a hassle-free laundry experience with less effort and more efficiency.

Features

Pearl Drum

for gentle drying

Aero Lifter

Special designed for less wrinkle

Water Tank Indicator

The indicator warns the user at the end of each cycle and if water tank is full during the cycle.

Boomerang Cabinet

Boomerang forms are designed to increase rigidity and stability, and to decrease vibration

Drain Hose

If drain hose is installed, user don't need to empty water tank at the end of each cycle.

Two way tumbling

Clockwise and counter clockwise drum rotation mixes laundry better and provides uniform drying.

Buzzer

The optional Buzzer feature goes off when the tumble dryer finishes the cycle and the laundry is ready to be taken out.

Drum Light

Loading and unloading of garments becomes easier by means of drum light.

Filter Clean Indicator

The indicator warns the user at the end of each cycle and if filter is blocked because of any reason, not to prevent air flow.

60 Hz

Tumble dryers can also be prepared to support 60Hz (220 - 240 V) versions.

Failure Detection Systems

Blinking leds and different buzzer tones provides detection of failure easily.

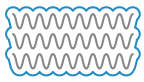

Condenser Clean Indicator

The indicator warns the user periodically to clean condenser.

Child Lock

Child lock option prevents unapproved interventions on the control panel during the machine operation by locking the buttons.

Safety for Heater

One NTC and two thermostats (manual and self) provide a high level protection for heater.

Delay Timer

Enables you to postpone the starting time of the drying process.

Standard for F1, F2, F4, and F4 Touch series.

Allergy Safe

Allergy safe program removes all allergens on the laundry and provides hygenic drying performance

Express Dry

2 rapid programs in the same machine

Condenser;
Shirts 12' - 3 shirtts in 12 min

Accessories

Stacking Kit

Stacking kit is a laundry accessory that fits between a front load washer and tumble dryer. Other than saving your valuable space, it also ensures your two appliances sit safely as one fixed unit.

Stacking kits are designed to distribute the weight of a dryer on top of a washer, and to absorb vibrations from both Appliances while they are running.

Dryer Rack

3D Rack

Dryer rack and 3D Rack options are the perfect solution for drying delicates, wool, lingerie, soft toys, and sport shoes in an easy way at home.

They protect the items from rotation during the drying cycle.

Color Options

WHITE

DARK SILVER

DARK INOX

BLACK & MATTE BLACK

New USA-CAN Product Range
