NOTE 2 – BASIS OF PRESENTATION OF FINANCIAL STATEMENTS

2.1 Basis of presentation

2.1.1 Statement of compliance

The accompanying financial statements are prepared in accordance with the Communiqué Serial II, No: 14.1, “Principals of Financial Reporting in Capital Markets” published in the Official Gazette numbered 28676 on 13 June 2013. According to the article 5 of the Communiqué, financial statements are prepared in accordance with Turkish Financial Reporting Standards (“TFRS”) issued by the Public Oversight Accounting and Auditing Standards Authority (“POAASA”) Turkish Accounting Standards Board. TAS contains Turkish Accounting standards, Turkish Financial Reporting standards (“TFRS”) and its addendum and interpretations (“TFRS”).

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise indicated.)

NOTE 2 – BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Cont’d)

2.1 Basis of presentation (Cont’d)

2.1.1 Statement of compliance (Cont’d)

The Company maintains its accounting records and prepares its statutory financial statements in accordance with the Turkish Commercial Code (“TCC”), tax legislation and the uniform chart of accounts issued by the Ministry of Finance. The financial statements, except for land, buildings and land improvements and the financial assets and liabilities presented with their fair values, are maintained under historical cost conversion in TL. These financial statements are based on the statutory records with the required adjustments and reclassifications reflected for the purpose of fair presentation in accordance with the TFRS.

The financial statements are presented in accordance with the specified format in “TFRS Taxonomy Announcement”, issued on 15 April, 2019 by the Public Oversight Authority (POA), and “the Financial Statements Examples and Guidelines for Use”, published by the CMB of Türkiye.

With the decision 11/367 taken on 17 March 2005, the CMB announced that, effective from 1 January 2005, the application of inflation accounting is no longer required for the companies operating in Turkey and preparing their financial statements in accordance with CMB Financial Reporting Standards. Accordingly, TAS 29, “Financial Reporting in Hyperinflationary Economies” issued by the TASB, has not been applied in the financial statements for the accounting year commencing from 1 January 2005.

In the announcement made by POA on 20 January 2022, companies that apply TFRS should not adjust financial statements for the year ended 31 December 2021 for TAS 29 - Financial Reporting in Hyperinflationary Economies. Afterwards, no new statement was made by the POA about the TMS 29 application and no adjustment was made to the financial statements as of 31 December 2022 in accordance with TAS 29.

2.2 Comparative information and restatement of prior period financial statements

Financial statements of the Company have been prepared comparatively with the preceding financial period, in order to enable determination of trends in financial position and performance. Comparative figures are reclassified, where necessary, to conform to changes in presentation in the financial statements.

2.3 Restatement and errors in the accounting estimates

Major changes in accounting policies are applied retrospectively and any major accounting errors that have been detected are corrected and the financial statements of the previous period are restated. Changes in accounting policies resulting from the initial implementation of a new standard, if any, are implemented retrospectively or prospectively in accordance with the transition provisions. If changes in accounting estimates are related to only one period, they are recognized in the period when changes are applied; if changes in estimates are related to future periods, they are recognized both in the period where the change is applied and future periods prospectively.

2.4. Amendments in Turkey Financial Reporting Standards

New standards, amendments and interpretations issued and effective for the financial year beginning 31 December 2022

Amendment to TFRS 16, ‘Leases’ – Covid-19 related rent concessions Extension of the practical expedient (effective 1 April 2021); As a result of the coronavirus (COVID-19) pandemic, rent concessions have been granted to lessees. In May 2020, the TASB published an amendment to TFRS 16 that provided an optional practical expedient for lessees from assessing whether a rent concession related to COVID-19 is a lease modification. On 31 March 2021, the TASB published an additional amendment to extend the date of the practical expedient from 30 June 2021 to 30 June 2022. Lessees can elect to account for such rent concessions in the same way as they would if they were not lease modifications. In many cases, this will result in accounting for the concession as variable lease payments in the period(s) in which the event or condition that triggers the reduced payment occurs.

A number of narrow-scope amendments to TFRS 3, TAS 16, TAS 37 and some annual improvements on TFRS 1, TFRS 9, TAS 41 and TFRS 16; effective from annual periods beginning on or after 1 January 2022.

- **Amendments to TFRS 3**, ‘Business combinations’ update a reference in TFRS 3 to the Conceptual Framework for Financial Reporting without changing the accounting requirements for business combinations.
- **Amendments to TAS 16**, ‘Property, plant and equipment’ prohibit a company from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, a company will recognise such sales proceeds and related cost in profit or loss.
- **Amendments to TAS 37**, ‘Provisions, contingent liabilities and contingent assets’ specify which costs a company includes when assessing whether a contract will be loss-making.

Annual improvements make minor amendments to TFRS 1, ‘First-time Adoption of TFRS’, TFRS 9, ‘Financial Instruments’, TAS 41, ‘Agriculture’ and the Illustrative Examples accompanying TFRS 16, ‘Leases’.

Standards, amendments, and interpretations that are issued but not effective as of 31 December 2022:

- **Narrow scope amendments to TAS 1, Practice statement 2 and TAS 8;** effective from annual periods beginning on or after 1 January 2023. The amendments aim to improve accounting policy disclosures and to help users of the financial statements to distinguish between changes in accounting estimates and changes in accounting policies.

NOTE 2 – BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Cont’d)

2.4. Amendments in Turkey Financial Reporting Standards

- **Amendment to TAS 12 – Deferred tax related to assets and liabilities arising from a single transaction;** effective from annual periods beginning on or after 1 January 2023. These amendments require companies to recognise deferred tax on transactions that, on initial recognition give rise to equal amounts of taxable and deductible temporary differences.
- **Amendment to TFRS 16 – Leases on sale and leaseback; effective from annual periods beginning on or after 1 January 2024. These amendments include requirements for sale and leaseback** transactions in TFRS 16 to explain how an entity accounts for a sale and leaseback after the date of the transaction. Sale and leaseback transactions where some or all the lease payments are variable lease payments that do not depend on an index or rate are most likely to be impacted.
- **Amendment to TAS 1 – Non current liabilities with covenants;** effective from annual periods beginning on or after 1 January 2024. These amendments clarify how conditions with which an entity must comply within twelve months after the reporting period affect the classification of a liability.

It is expected that these changes will not be material effect on financial situation and performance of the company.

2.5. Summary of significant accounting policies

2.5.1 Revenue

The Company recognizes revenue in accordance with TFRS 15 “Revenue from contracts with customers” standard by applying the following five step model:

- Identification of customer contracts
- Identification of performance obligations
- Determination of transaction price in the contract
- Allocation of price to performance obligations
- Recognition of revenue when the performance obligations are fulfilled.

NOTE 2 – BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Cont’d)**2.5. Summary of significant accounting policies (Cont’d)****2.5.1 Revenue (Cont’d)**

Revenue from sale of goods is recognized when all of the following conditions are satisfied:

- (a) The parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations,
- (b) Company can identify each party’s rights regarding the goods or services to be transferred,
- (c) Company can identify the payment terms for the goods or services to be transferred,
- (d) The contract has commercial substance,
- (e) It is probable that Company will collect the consideration to which it will be entitled in exchange for the goods or services that will be transferred to the customer. In evaluating whether collectability of an amount of consideration is probable, an entity shall consider only the customer’s ability and intention to pay that amount of consideration when it is due.

2.5.2 Inventories

Inventories are stated at the lower of cost and net realizable value. Costs, including an appropriate portion of fixed and variable overhead expenses, are assigned to inventories held by the method most appropriate to the particular class of inventory. Company uses moving weighted average method for costing.

Net realizable value represents the estimated selling price less all estimated costs of completion and costs necessary to make a sale. When the net realizable value of inventory is less than cost, the inventory is written down to the net realizable value and the expense is included in statement of income in the period the write-down or loss occurred.

When the circumstances that previously caused inventories to be written down below cost no longer exist or when there is clear evidence of an increase in net realizable value because of changed economic circumstances, the amount of the write-down is reversed. The reversal amount is limited to the amount of the original write-down.

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise indicated.)

NOTE 2 – BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Cont’d)**2.5. Summary of significant accounting policies (Cont’d)****2.5.3 Property, plant and equipment**

Land, land improvements and buildings are stated at fair value, based on valuations performed as at 31 December 2022.

Property, plant and equipment except for land, land improvements and buildings acquired after 1 January 2005 are carried at cost, less accumulated amortization and impairment losses, if any.

Any revaluation increase arising on the revaluation of such land, land improvements and buildings is credited in equity to the revaluation reserve, except to the extent that it reverses a revaluation decrease for the same asset previously recognized in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously charged. A decrease in carrying amount arising on the revaluation of such land, land improvements and buildings is charged to profit or loss to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset. Depreciation on revalued land improvements and buildings is charged to profit or loss.

Each period, the difference between depreciation based on the revalued carrying amount of the asset (the depreciation charged to the statements of comprehensive income) and the depreciation based on the asset’s original cost is transferred from revaluation reserves to the retained earnings.

Land is not depreciated. Machinery and equipment are carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is charged so as to write off the cost or valuation of assets, other than land and properties under construction, over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

NOTE 2 – BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Cont’d)

2.5. Summary of significant accounting policies (Cont’d)

2.5.3 Property, plant and equipment (Cont’d)

Useful lives of property, plant and equipment is as follows:

	Useful life
Land improvements	5 - 35 years
Buildings	20 - 50 years
Leasehold improvements	5 years
Plant and machinery	3 - 15 years
Motor vehicles	5 years
Furniture and fixtures	5 - 10 years
Leasehold improvements	1-5 years

Property, plant and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset’s carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset’s fair value less costs to sell and value in use.

Gains or losses on disposals of property, plant and equipment are determined by reference to their carrying amounts and are included in the related income and expense accounts, as appropriate. On the disposal of revalued assets, amounts in the revaluation reserve relating to that asset are transferred to the retained earnings.

Subsequent costs such as repairs and maintenance or part replacement of plant and equipment are included in the asset’s carrying value or recognized as separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company. All other costs are charged to the statements of comprehensive income during the financial period in which they are incurred.

Leases

The Company – as a lessee

At inception of a contract, the Company assesses whether a contract is, or contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset. The Company assess whether:

- a) The contract involved the use of an identified asset – this may be specified explicitly or implicitly.
- b) The asset should be physically distinct or represent substantially all of the capacity of a physically distinct asset, if the supplier has a substantive substitution right, the asset is not identified.
- c) The Company has the right to obtain substantially all of the economic benefits from the use of an asset throughout the period of use; and
- d) The Company has the right to direct use of the asset, The Company concludes to have the right of use, when it is predetermined how and for what purpose the Company will use the asset. The Company has the right to direct use of asset if either:
 - i. The Company has the right to operate (or to have the right to direct others to operate) the asset over its useful life and the lessor does not have the rights to change the terms to operate or;
 - ii. The Company designed the asset (or the specific features) in a way that predetermines how and for what purpose it is used

At the actual commencement date of the contract, the Company reflects a right-of-use asset and a lease liability in its financial statements.

The Company rents various buildings, warehouses, forklifts and machinery. The duration of the leasing contracts for machine and equipment is usually 4 years; for building and warehouses is usually fixed from 1 to 20 years.

Lease Liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date. Lease liabilities are discounted to present value by using the interest rate implicit in the lease if readily determined or with the Vestel Group Company’s incremental borrowing rate. Lease payments included in the measurement of the lease liability comprise the following:

- a) Fixed payments, including in-substance fixed payments;
- b) Variable lease payments that depend on an index or a rate, initially measured using the index or rate as the commencement date.
- c) The exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewable period if the Company is reasonably certain to exercise an extension option and penalties for early termination of a lease unless the Company is reasonably certain to terminate early.

After initial recognition, the lease liability is measured:

- a) Increasing the carrying amount to reflect interest on lease liability,
- b) Reducing the carrying amount to reflect the lease payments made and
- c) Remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments.

The duration of the contracts, which constitute the lease obligation of the company, varies between 1 - 20 years.

The Company – as a lessor

The Company’s activities as a lessor are not material.

2.5. Summary of significant accounting policies (Cont’d)

2.5.3 Property, plant and equipment (Cont’d)

Right of use assets:

Right of use is recognized with cost method at first and includes items below:

- a) the amount of the initial measurement of the lease liability,
- b) any lease payments made at or before the commencement date, less any lease incentives received,
- c) any initial direct costs incurred by the Company

To apply the cost model, the Company measures the right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses and adjusted for any remeasurement of the lease liability. The Company applies the depreciation requirements in TAS 16 Property, Plant and Equipment in depreciating the right-of-use asset.

2.5.4 Intangible assets

a) Research and development costs

Research costs are recognized as expense in the period in which they are incurred. An intangible asset arising from development (or from the development phase of an internal project) if and only if an entity can demonstrate all of the following:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale;
- Its intention to complete the intangible asset and use or sell it;
- Its ability to use or sell the intangible asset;
- How the intangible asset will generate probable future economic benefits;
- The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset, and
- Its ability to measure reliably the expenditure attributable to the intangible asset during its development

Other development costs are recognized as expense as incurred. If it is not possible to distinguish the research phase from the development phase of an internal project, the entity treats the expenditure on that project as if it were incurred in the research phase only.

2.5. Summary of significant accounting policies (Cont’d)

2.5.4 Intangible assets (Cont’d)

b) Rights and other intangible fixed assets

Rights and other intangible assets consist acquired computer software, computer software development costs and other identifiable rights. Rights and other intangible assets are recognized at their acquisition costs and are amortized on a straight line basis over their expected useful lives which are less than fifteen years.

Useful lives of intangible assets are as follows:

	<u>Useful life</u>
Rights	3 - 15 years
Development cost	2 - 10 years
Other	2 - 15 years

2.5.5 Financial instruments

a) Financial assets

The Company classifies its financial assets into three categories: financial assets measured at amortized cost, fair value through profit or loss and fair value through other comprehensive income. The classification depends on the basis of the business model determined according to utilization purposes and expected cash outflows. The Company classifies its financial assets at the time of initial recognition.

Financial assets carried at amortized cost

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest, whose payments are fixed or predetermined, which are not actively traded and which are not derivative instruments are measured at amortized cost.

The Company’s financial assets carried at amortized cost comprise “trade receivables” and “cash and cash equivalents” in the statement of financial position.

NOTE 2 – BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Cont’d)**2.5. Summary of significant accounting policies (Cont’d)****2.5.5 Financial instruments (Cont’d)**Financial assets carried at fair value

Assets that are held by the management for collection of contractual cash flows and for selling the financial assets are measured at their fair value.

Impairment of financial assets

Impairment of the financial and contractual assets measured by using “Expected credit loss model”. The impairment model applies for amortized financial and contractual assets.

The Company has preferred to apply “simplified approach” for the recognition of impairment losses on trade receivables, carried at amortised cost and that do not comprise of any significant finance component (those with maturity less than 1 year). In accordance with the simplified approach, Company measures the loss allowances regarding its trade receivables at an amount equal to “lifetime expected credit losses” except incurred credit losses in which trade receivables are already impaired for a specific reason.

b) Financial liabilities

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

2.5. Summary of significant accounting policies (Cont’d)

2.5.5 Financial instruments (Cont’d)

c) Derivative financial instruments and hedge accounting

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value.

The derivative instruments of the Company mainly consist of foreign exchange forward contracts. These derivative transactions, even though providing effective economic hedges under risk accounting, do not generally qualify for hedge accounting under the specific rules and are therefore treated as derivatives held for trading in the financial statements. The fair value changes for these derivatives are recognised in the profit or loss statement.

The hedging transactions of the Company that qualify for hedge accounting are accounted in accordance with TFRS 9. TFRS 9 does not create any changes in hedge accounting principles. It is considered TFRS 9 has significant effect on financial statements.

Cash flow hedges:

As long as a cash flow hedge meets the qualifying criteria, the hedging relationship shall be accounted for as follows:

(a) the separate component of equity associated with the hedged item (cash flow hedge reserve) is adjusted to the lower of the following (in absolute amounts):

- (i) the cumulative gain or loss on the hedging instrument from inception of the hedge; and
- (ii) the cumulative change in fair value (present value) of the hedged item (i.e. the present value of the cumulative change in the hedged expected future cash flows) from inception of the hedge.

(b) the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge shall be recognised in other comprehensive income.

(c) any remaining gain or loss on the hedging instrument is hedge ineffectiveness that shall be recognised in profit or loss.

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise indicated.)

NOTE 2 – BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Cont’d)**2.5. Summary of significant accounting policies (Cont’d)****2.5.6 Foreign currency transactions**

Transactions in foreign currencies during the period are recorded at the rates of exchange prevailing on the dates of the transactions. Monetary items denominated in foreign currencies are translated to TL at the rates prevailing on the balance sheet date. Exchange differences on foreign currency denominated monetary assets and liabilities are recognized in profit or loss in the period in which they arise except for the effective portion of the foreign currency hedge of net investments in foreign operations. On-monetary items which are denominated in foreign currency and measured with historical costs are translated using the exchange rates at the dates of initial transactions.

2.5.7 Provisions, contingent assets and liabilities

Provisions are recognized when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle that obligation, and a reliable estimate can be made of the amount of the obligation.

Possible assets or obligations that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain events not wholly within the control of the company are not included in the financial statements and treated as contingent assets or liabilities.

2.5.8 Related parties

Shareholders, key management personnel and board members, their close family members and companies controlled, jointly controlled or significantly influenced by them and Zorlu Holding Company companies are considered and referred to as related parties.

2.5. Summary of significant accounting policies (Cont’d)

2.5.9 Taxation on income

Tax expense for the period comprises current and deferred tax. Tax is recognized in the income statement, except to the extent that it relates to items directly recognized in equity. In that case, tax is recognized in shareholders’ equity.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company’s liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases which is used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Investment incentives that are conducive to payment of corporate taxes at reduced rates are subject to deferred tax calculation when there is reasonable assurance that the Company will benefit from the related incentive.

Deferred tax liabilities are recognized for taxable temporary differences except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Transfer pricing

The transfer pricing provisions have been stated under the Article 13 of Corporate Tax Law with the heading of “disguised profit distribution via transfer pricing”. The General Communiqué on disguised profit distribution via transfer pricing, dated 18 November 2007 sets the implementation procedures of the law. If a tax payer enters into transactions regarding sale or purchase of goods and services with related parties, where the prices are not set in accordance with arms’ length principle, then related profits are considered to be distributed in a disguised manner through transfer pricing. Such disguised profit distributions through transfer pricing are not accepted as tax deductible items for corporate income tax purposes.

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise indicated.)

NOTE 2 – BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Cont’d)

2.5. Summary of significant accounting policies (Cont’d)

Tax exposures

In determining the amount of current and deferred tax, the Company takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. This assessment relies on estimates and assumptions and may involve a series of judgements about future events. New information may become available that causes the Company to change its judgement regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

2.5.10 Employee benefits

Employment termination benefits, as required by the Turkish Labor Law, represent the estimated present value of the total reserve of the future probable obligation of the Company arising in case of the retirement of the employees. According to Turkish Labor Law and other laws applicable in Turkey, the Company is obliged to pay employment termination benefits to all personnel in cases of termination of employment without due cause, call for military service, be retired or death upon the completion of a minimum one year service. Provision for employment termination benefits as of 31 December 2022 is calculated in accordance with the assumptions used by the independent actuarial firm and is recorded in the financial statements at its net present value. Employment termination benefits are considered as being part of defined retirement benefit plan as per TAS 19. All actuarial gains and losses are recognized in statements of income.

2.5.11 Government grants

Government grants, including non-monetary grants at fair value, are recognized in financial statements when there is reasonable assurance that the entity will comply with the conditions attaching to them, and the grants will be received.

Incentives for research and development activities are recognized in financial statements when they are authorized by the related institutions.

2.5.12 Earnings per share

Earnings per share disclosed in the statement of income is determined by dividing net income attributable to equity holder of the parent by the weighted average number of such shares outstanding during the year concerned.

NOTE 2 – BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Cont’d)

2.5. Summary of significant accounting policies (Cont’d)

2.5.13 Statement of cash flows

In the statement of cash flows, cash flows are classified into three categories as operating, investment and financing activities. Cash flows from operating activities are those resulting from the Company’s production and sales activities. Cash flows from investment activities indicate cash inflows and outflows resulting from property, plant and equipments and financial investments. Cash flows from financing activities indicate the resources used in financing activities and the repayment of these resources. Cash and cash equivalents comprise of cash in hand accounts, bank deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash with maturities equal or less than three months.

2.5.14 Offsetting

All items with significant amounts and nature, even with similar characteristics, are presented separately in the financial statements. Insignificant amounts are grouped and presented by means of items having similar substance and function. When the nature of transactions and events necessitate offsetting, presentation of these transactions and events over their net amounts or recognition of the assets after deducting the related impairment are not considered as a violation of the rule of non-offsetting. As a result of the transactions in the normal course of business, revenue other than sales are presented as net if the nature of the transaction or the event qualify for offsetting.

2.5.15 Events after the balance sheet date

Events after the balance sheet date, announcements related to net profit or even declared after other selective financial information has been publicly announced; include all events that take place between the balance sheet date and the date when balance sheet was authorized for issue.

In the case that events require a correction to be made on the balance sheet date, the Company makes the necessary corrections to the financial statements. Moreover, the events that occur subsequent to the balance sheet date and that do not require a correction to be made are disclosed in accompanying notes, where the decisions of the users of financial statements are affected.

2.5.16 Going concern

The Company prepared financial statements in accordance with the going concern assumption.

2.6. Critical accounting estimates and judgments

Preparation of financial statements requires the use of estimates and assumptions that may affect the amount of assets and liabilities recognized as of the balance sheet date, disclosures of contingent assets and liabilities and the amount of revenue and expenses reported. Although these estimates and assumptions rely on the Company management’s best knowledge about current events and transactions, actual outcomes may differ from those estimates and assumptions. Significant estimates of the Company management are as follows:

2.5. Summary of significant accounting policies (Cont’d)

2.6. Critical accounting estimates and judgments (Cont’d)

i. Revaluation of lands, buildings and land improvements

Land, land improvements and buildings are stated at fair value, based on valuations performed at 31 December 2022 by professional independent valuer firm. (Note 11).

As there were no recent similar buying/selling transactions nearby, revaluations of land were based on the method of market approach whereas revaluations of buildings and land improvements and machinery and equipment were based on the method of cost approach and based on the following valuation techniques and assumptions:

- Revaluations of land were based on the method of reference comparison whereas revaluations of buildings and land improvements were based on the method of cost approach, considering existing utilization of the aforementioned property, plant and equipments are consistent to the highest and best use approach.
- In the market reference comparison method, current market information was utilized, taking into consideration the comparable property in the market in recent past in the region, price adjustment was made within the framework of criteria that could affect market conditions, and accordingly an average m2 sale value was determined for the lands subject to the valuation. The similar pieces of land found were compared in terms of location, size, settlement status, physical conditions, real estate marketing firms were consulted for up-to-date valuation of the estate market, also, current information and experience of the professional valuation company was utilized.
- In the cost approach method, fair value of the buildings and land improvements was calculated by considering depreciation on the re-construction costs. In the cost approach method, above explained market reference comparison method was used in calculation of the land value, one of the components.

The carrying values of land, land improvements and buildings do not necessarily reflect the amounts that would result from the outcome of a sales transaction between independent parties.

As of initial recognition and as of balance sheet date, the Company performs impairment assessment for buildings and land improvements of which valuations are based on cost approach, accordance with the TAS 36 “Impairment of Assets”, and no impairment indicator is identified.

NOTE 3 - SEGMENT REPORTING

Operating segments are identified on the same basis as financial information is reported internally to the Company’s chief operating decision maker. The Company’s Board of Directors has been identified as the Company’s chief operating decision maker who is responsible for allocating resources between segments and assessing their performances. The Company management determines operating segments by reference to the reports reviewed by the Board of Directors to make strategic decisions.

The Management believes that the Company operates in a single industry sector as the risks and returns for the activities do not show any material difference because the scope of activity covers only the production of white goods and the production processes and classes of customers are similar. As a result all information related to the industrial segment has been fully presented in the attached financial statements.

The Management has decided to use geographical segments for segment reporting considering the fact that risks and returns are affected by the differences in geographical regions.

NOTE 17 – EMPLOYEE BENEFITS

Liabilities for employee benefits:

	31 December 2022	31 December 2021
Due to personnel	116.402	47.465
Social security payables	53.611	21.399
	170.013	68.864

Long term provisions for employee benefits:

	31 December 2022	31 December 2021
Provision for employment termination benefits	518.760	151.875

Under Turkish law, the Company is required to pay employment termination benefits to each employee whose employment is terminated without due cause. In addition, under the existing Social Security Law No. 506, clause No. 60, amended by the Labor Laws dated 6 March 1981, No. 2422 and 25 August 1999, No. 4447, the Company is also required to pay termination benefits to each employee who has earned the right to retire by receiving termination indemnities.

The amount payable is the equivalent of one month’s gross salary for each year of service and is limited to a maximum of full TL 15.371,40 TL / year as of 31 December 2022 (31 December 2021: 8.284,51 TL/year).

The provision is calculated by estimating the present value of the future obligation of the company arising from retirement of employees. Turkish Accounting Standards No: 19 (“Employee Benefits”) requires actuarial valuation methods to be developed to estimate the enterprise’s obligation under defined employee plans. Accordingly actuarial assumptions were used in the calculation of the total liability which is described below:

VESTEL BEYAZ EŞYA SANAYİ VE TİCARET ANONİM ŞİRKETİ NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD 1 JANUARY - 31 DECEMBER 2022

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise indicated.)

NOTE 17 – EMPLOYEE BENEFITS (Cont'd)

The principal assumption is that the maximum liability for each year of service will increase in line with inflation. Thus, the discount rate applied represents the expected real rate after adjusting for the anticipated effects of future inflation. An expected inflation rate and appropriate discount rate should both be determined, the net of these being real discount rate. Consequently in the accompanying financial statements as at 31 December 2022 the provision is calculated by estimating the present value of the future obligation of the company arising from retirement of employees. As of 31 December 2022 provision is calculated based on real discount rate of 9,16% (31 December 2021: annual inflation rate; 15,8%, discount rate; 20,9% and real discount rate; 4,44%) assuming 7,02% annual inflation rate and 2,00% discount rate.

The principal assumption is that the maximum liability for each year of service will increase in line with inflation. Thus, the discount rate applied represents the expected real rate after adjusting for the anticipated effects of future inflation. The maximum amount of TL 19.982,83 which is effective from 1 January 2023 (1 January 2022: TL 10.848,59) has been taken into consideration in calculating the provision for employment termination benefits of the Company which is calculated once in every six months.

The movements in the provision for employment termination benefit are as follows:

	1 January - 31 December 2022	1 January - 31 December 2021
Balance at 1 January	151.875	85.734
Increase during the year	28.015	17.063

In Turkey, advance tax returns are filed on a quarterly basis at the rate of 23%, until the 17th day of the following month and paid until the 17th day. Advance tax returns files within the year are offset against corporate income tax calculated over the annual taxable corporate income.

According to the Corporate Tax Law, 50% of the capital gains arising from the sale of tangible assets and 75% of sale of investments in equity shares owned for at least two years are exempted from corporate tax on the condition that such gains are reflected in the equity.

Under the Turkish taxation system, tax losses can be carried forward to be offset against future taxable income for up to five years. Losses cannot be carried back.

NOTE 28 – FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (Cont’d)

b.5) Interest rate risk:

The Company is exposed to interest rate risk as the Company borrow funds at both fixed and floating interest rates. The risk is managed by the Company by maintaining an appropriate mix between fixed and floating rate borrowings, by the use of interest rate hedge contracts and forward interest rate contracts.

Analysis of financial instruments of the Company which are sensitive to interest rate changes is as follows:

	31 December 2022	31 December 2021
Financial instruments with fixed interest rates		
Time deposits	151.485	78.932
Financial liabilities	876.713	475.591
Financial instruments with variable interest rates		
Financial liabilities	5.340.802	859.249
Other liabilities	-	-

On 31 December 2022, if interest rates of all currency denominated financial assets and liabilities with variable interest rates has strengthened / weakened by 100 basis points with all other variables held constant, income before taxes would have been TL 16.979 (2021: TL 1.351) lower / higher as a result of interest expenses.

NOTE 29 - FINANCIAL INSTRUMENTS (FAIR VALUE AND HEDGE ACCOUNTING DISCLOSURES)

Categories of financial instruments and fair values

The Company classifies its financial assets into three categories: financial assets measured at amortized cost, fair value through profit or loss and fair value through other comprehensive income. Among Company’s financial assets, cash and cash equivalents (note 4), trade receivables (notes 6 and 7) and other receivables (notes 6 and 8), are classified as loans and receivables and are measured at amortized cost using the effective interest method.

Company’s financial liabilities consist of financial liabilities (note 5) and trade payables (note 7) are measured at amortized cost using the effective interest method.

**NOTE 29 - FINANCIAL INSTRUMENTS (FAIR VALUE AND HEDGE ACCOUNTING DISCLOSURES)
(Cont’d)**

Fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The estimated fair values of financial instruments have been determined by the Company, using available market information and appropriate valuation methodologies. However, judgement is necessarily required to interpret market data to estimate the fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. Following methods and assumptions were used to estimate the fair value of the financial instruments for which is practicable to estimate fair value:

Monetary assets

The book value of foreign currency denominated balances which are translated to TL using exchange rates prevailing on the date of the balance sheet approximate their fair values. For financial assets measured at cost including cash and cash equivalents, the carrying amounts are the same with fair values due to their short term nature. Carrying amounts of trade receivables net of impairments approximate their fair values.

Monetary liabilities

The fair values of short term financial liabilities and other financial liabilities are estimated to be their fair values since they are short term. Fair value is calculated by discounting the cash out flows regarding due dates of financial liabilities considering the changing country risk premium and changes in the market interest rates.

Fair value hierarchy

The Company classifies the fair value measurement of each class of financial instruments according to the source, using the three level hierarchy, as follows:

Level 1: Market price valuation techniques for the determined financial instruments traded in markets (unadjusted)

Level 2: Other valuation techniques includes direct or indirect observable inputs

Level 3: Valuation techniques do not contain observable market inputs
