COMPANY PROFILE

VESTEL CITY, WHICH COMPRISES NINE PLANTS LOCATED IN MANISA, IS AMONGST THE BIGGEST INDUSTRIAL COMPLEXES OF THE WORLD.

>

20.000
Employees

1.300.000 m²
Closed Production Area

Export Leader of Turkey with
$ 2,3 Billion

30 Million
Device Production Capacity

$ 3,5 Billion
Turnover

Vestel City, which comprises nine plants located in Manisa, is amongst the biggest industrial complexes of the world.

Comprised of 28 companies, Vestel Group is a multi-industry manufacturer that operates in consumer electronics, major domestic appliances, professional displays, automotive and battery solutions, and EV Chargers. Testimony to the global importance of Zorlu Holding across multiple technology sectors, Vestel is not only thriving at home in Turkey, but also through a further 11 subsidiaries that have been set up in various other parts of the world. Thanks to its renowned manufacturing and R&D complex, Vestel exports to more than 160 countries and keeps its position as a global player.

Vestel is one of the ten biggest major domestic appliances manufacturers in Europe, with its new product development ability, flexibility in production, and fast response to clients' demands.

Operating with an annual capacity of 4.9 million units, the company's two refrigerator plants produce a variety of models ranging from french door, no-frost, combi, double door, single door, to tabletop fridges and freezers, as well as built-in models.

Achieving similar success with washing machines, Vestel is able to produce 3.8 million units a year, with large models range from 4 kg to 12 kg drum capacities washer and 7kg/5kg, 8kg/6kg, 9kg/6kg,10kg/6kg drum capacities washer/dryer. Vestel's product range also includes built-in washer and washer/dryer with the drum capacities of 7 kg, 8 kg and 7/5 kg.

Vestel tumble dryers are produced 1.2 million units a year, with models ranging from 7 kg to 12 kg capacities. The group is capable of producing both condenser and heat pump type of tumble dryers with high efficiency.

The plant for cooking appliances operates with an annual capacity of 2.7 million units, producing free standing cookers, built-in hobs and ovens.

The major domestic appliances product range includes free standing, semi and fully integrated dishwashers. The 86 cm high tall tub and deep tall tub dishwasher developed for the US market have started to be produced for the first time. The plant has the capacity to produce 2.5 million units a year for now. New dishwasher factory is under construction and capacity will reach 4 million unit per year over time.

In addition, the air conditioner factory is capable of producing 420,000 sets of split-type models.

R&D facilities located in Turkey, the UK, and China employ the highest caliber engineers to develop hardware and software solutions that provide clients with world-class quality products.

VestelKom factory located in free trade zone of Izmir, has a special R&D team for manufacturing and testing batteries and EV Chargers, which is also exporting these goods to Europe with zero customs tax.

Vestel has proven its success in product design by receiving the most prestigious design awards every year from well-known industrial design organizations for a variety of products.

Vestel Trade, the company responsible for the marketing and sales of Vestel products overseas, exports 75% of its production under leading Japanese and European brands to 160+ countries.

Vestel appeals to different consumer tastes in 160+ countries with its wide range of products, which reflects its competencies in technological development, design and product customization. Accounting for 90% of Turkey's TV exports and 35% of the nation's white goods exports, Vestel has been an unwavering export leader in the Turkish electronics sector for the past 25 years.

For a sustainable future and transition to an economy based on net zero emissions, Vestel triggers transformation across the entire value chain. Leveraging the power of Industry 4.0 and automation to support the reduction of energy consumption through operational improvements and innovative products, Vestel implements circular models to improve resource efficiency in production and reduce our environmental impact from products.

Vestel aims to reach net zero emissions by 2050, first in its own operations and then in its entire value chain. Vestel is working on decarbonization plan as part of its commitment to set Science Based Targets (SBTi).

A

Top class ratings for ”energy consumption”, ”cleaning & drying performance”. The minimum energy class is A++ and the cleaning & drying performance is A for entire model range.

Auto Door

Auto Door provides more efficient drying process by automatically opening the door during drying phase which lets the hot air to out of the dishwasher (necessary energy amount to dry the dishes is reduced significantly).

A+++ -20% energy labeling for 14 place setting is achieved with the help of this technology.

Water Box

The working principle of Water Box Technology is based on getting the last clean cycle rinse water, filtering it to avoid any particles and saving it in an isolated box.

Then it can be used as the prewash cycle cleaning water next for the cycle.

5,4 lt water consumption with A+++ -20% energy rating for 15 P.S. is achieved with the help of this technology.

ion tech

Natural Ion Tech spreads negative ions inside the dishwasher. These negative ions neutralize particles of unpleasant smell. Natural Ion Tech removes odors caused by dirty dishes.

PureBeam

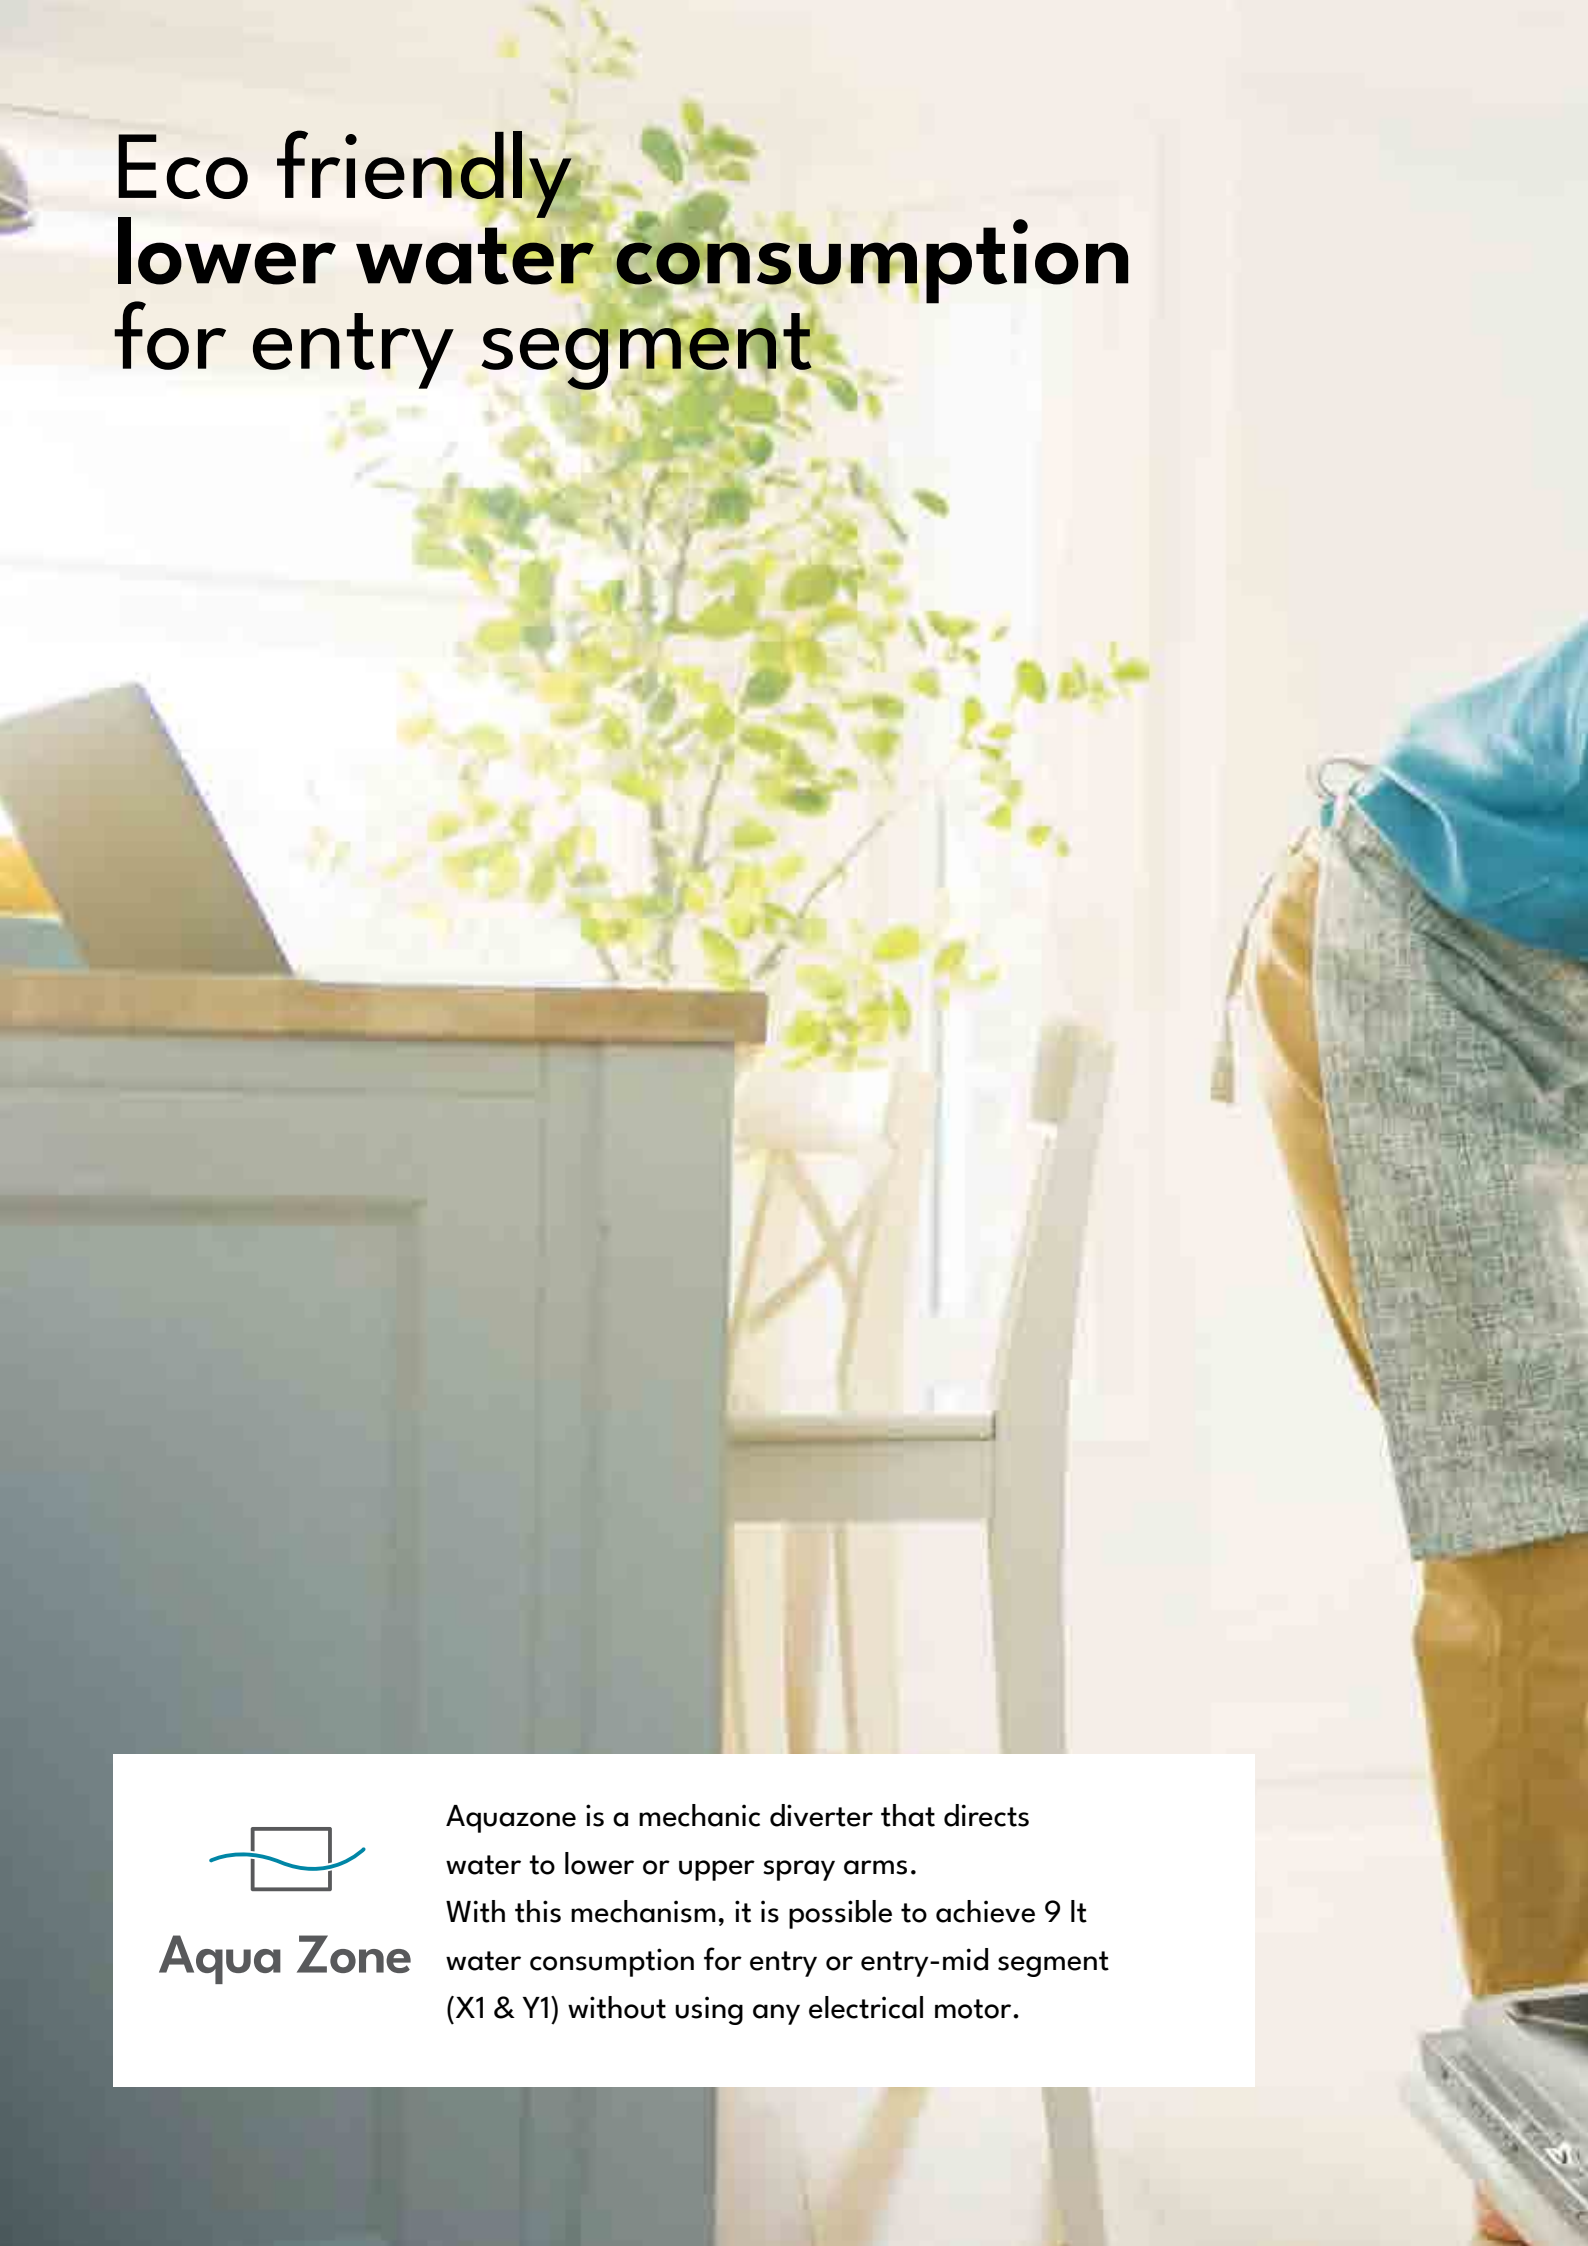
UV feature prevents bacterial growth and kill the bacteria remaining after washing cycle.

It disinfects the load using the UV technology built into machine, automatically sterilizing each load before unload.

It will be a real easiness for parents with babies.

Silent Wash

It is possible to have more silent washing with variable speed motor technology! Extra silent option decreases noise level of program without decreasing cleaning quality in day or night time when silence is required.



Eco friendly **lower water consumption** for entry segment

Aqua Zone

Aquazone is a mechanic diverter that directs water to lower or upper spray arms.
With this mechanism, it is possible to achieve 9 lt water consumption for entry or entry-mid segment (X1 & Y1) without using any electrical motor.

Washing performance

Direct Wash

Direct wash spray system is used for washing baby bottles and glasses more effective.

Triple Wash

Triple wash feature offers wide washing option to user.
User can wash hard soiled pans and cookers
more effective with triple wash sprays.

Auto Glass Safe

The dishwasher automatically cleans the filter and ensures that the dishwasher performs like the first day every time.

Auto Clean Filter

The dishwasher automatically cleans the filter and ensures that the dishwasher performs like the first day every time.

Programs
Delay
40°
70
40°

Steam Wash

Steam wash technology softening the most stubborn dirts by steam power. High temperature and directly applied steam ensure perfect hygiene and gentle cleaning for your sensitive dishes.

Smart Wash

Turbidity sensor detects the amount of turbidity in water and adjusts the washing cycle parameters (temperature, duration, amount of water) accordingly.

Extra Drying

It is possible to have better drying performance with extra drying option. This option increases water temperature at final rinse step and drying step duration up to 10 min.

Extra Fast

Extra fast option decreases program duration while it is increasing water temperature and pressure to ensure high washing quality in a shorter duration.

Hygienic Wash

Extra hygiene option which is developed for Vestel Dishwashers ensures a maximum hygiene with high temperature washing. It increases water temperature at final rinse step in order to eliminate bacteria up to %99.9999.

QuickClean

VESTEL dishwashers achieves A class cleaning performance with advanced cleaning program in only 50 min without diverter. You can save time with this program. It is the first and unique dishwasher that achieves A class cleaining performance in only 50 minutes for standart soiled dishes according to EN standards.

Extra Rinse

Extra rinse option adds an extra rinse step to achieve more hygienic washing. Program duration is increased between min. %4 and max. %16 according to the washing program.

Antibacterial Filter

By using Antibacterial PP Sump Filter bacterial growth on the filter surface eliminated up to 99%.

Tablet Option

With this option, water reaches optimum temperature to dissolve he combined detergent ideally and eliminates such drawbacks and assures maximum performance when tablet detergents are used.

Hydro Power

This technology enables all other options and program to save water, energy and time. Also by changing water pressure noise level can be reduced to have more silent washing with BLDC pump technology.

Delay Timer

The start time of a program can be delayed, e.g. to benefit from economy rates of electricity. A delay start time of between 1 hour and 24 hours can be selected.

Child Lock

Child lock option never allows your children to play with your dishwasher. It allows you to lock the buttons on the control panel to be able to restrict the functionality of buttons.

Half Load

Eco Friendly Half Load technology provides washing performance when dishwasher is not fully loaded, only lower basket or upper basket or both are used with half load if necessary by using half load option. Half Load technology saves energy and water by reducing energy and water consumption due to load options.

DualPro Wash

Advanced pump technology allows for one wash to be cleaned at two separate water pressures. Baked on food doesn't stand a chance in the bottom while the delicate glasses in the top are gently being washed.

KnifeShelf

With this accessory, the product capacity will be increased, which is the trend in the market, with cost friendly value even with entry segment products. The models with 12 Place Setting Capacity can be increased to 14 Place Setting automatically only adding this accessory.

Vario Space

VarioSpace is a general feature that gives many options to the end user ragarding lower and upper basket variations.

JetWash

With this fast program, you can clean the dishes like less and/or recently soiled (coffee, milk and tea etc.) in only 14 minutes. This program is one of the fastest programs in the world. It cleans your dishes with 4 place settings capacity in 14 minutes.

Multifunctional rack

The multifunctional rack creates more dish-loading possibilities, enabling you to expand your dishwasher's capacity to up to 16 place settings.

Heater Safety Protection

In case of lack of water, with the help of a pressure switch, the resistance is prevented from being in operation. So both the resistance and the machine itself are protected.

Overflow and Leakage Protection

The dishwasher activates overflow mode when there is too much water in the dishwasher and the excess water get is drained. It also detects leaks in the base of the dishwasher, shuts down operation and automatically pumps out water before reaching to floor. The unit can auto reset the overflow mode until the water level in the basement cover reaches a certain level.

3rd Rack
Eco/Easy/Comfort Tray

Eco Tray

New fixed design option for 3rd rack that provides up to 16PS setting.

Comfort Tray

High-end side by side sliding basket structure for 60 cm range providing up to 16PS setting capacity.

Easy Tray

The upper cutlery basket is designed to place forks, spoons and knives, long dippers and small items. It is possible to take out the dishes along with the 3rd rack after washing. The Upper Cutlery Basket is composed of two pieces; You can take out left or right part of the upper cutlery basket to obtain more space for the dishes in the upper basket

Mini Active Drying System

Mini active drying system provides basic drying performance on dishes with its mini fins.

Super Active Drying System

A portion of the washtub wall is a heat exchanger which, at the end of the rinsing cycle, promotes condensation of the water inside the tub, and hence drying of the dishes.

Turbo Drying System

It activates a fan which draws steam out of the dishwasher cabinet. Air circulation is much more forced, hence results in most efficient drying performance.
