30 Million
Device Production
Capacity

$ 3,5 Billion
Turnover

Vestel City, which comprises nine plants located in Manisa, is amongst the biggest industrial complexes of the world.

Comprised of 28 companies, Vestel Group is a multi-industry manufacturer that operates in consumer electronics, major domestic appliances, professional displays, automotive and battery solutions, and EV Chargers. Testimony to the global importance of Zorlu Holding across multiple technology sectors, Vestel is not only thriving at home in Turkey, but also through a further 11 subsidiaries that have been set up in various other parts of the world. Thanks to its renowned manufacturing and R&D complex, Vestel exports to more than 160 countries and keeps its position as a global player.

Vestel is one of the ten biggest major domestic appliances manufacturers in Europe, with its new product development ability, flexibility in production, and fast response to clients' demands.

Operating with an annual capacity of 4.9 million units, the company's two refrigerator plants produce a variety of models ranging from french door, no-frost, combi, double door, single door, to tabletop fridges and freezers, as well as built-in models.

Achieving similar success with washing machines, Vestel is able to produce 3.8 million units a year, with large models range from 4 kg to 12 kg drum capacities washer and 7kg/5kg, 8kg/6kg, 9kg/6kg,10kg/6kg drum capacities washer/dryer. Vestel's product range also includes built-in washer and washer/dryer with the drum capacities of 7 kg, 8 kg and 7/5 kg.

Vestel tumble dryers are produced 1.2 million units a year, with models ranging from 7 kg to 12 kg capacities. The group is capable of producing both condenser and heat pump type of tumble dryers with high efficiency.

The plant for cooking appliances operates with an annual capacity of 2.7 million units, producing free standing cookers, built-in hobs and ovens.

The major domestic appliances product range includes free standing, semi and fully integrated dishwashers. The 86 cm high tall tub and deep tall tub dishwasher developed for the US market have started to be produced for the first time. The plant has the

capacity to produce 2.5 million units a year for now. New dishwasher factory is under construction and capacity will reach 4 million unit per year over time.

In addition, the air conditioner factory is capable of producing 420,000 sets of split-type models.

R&D facilities located in Turkey, the UK, and China employ the highest caliber engineers to develop hardware and software solutions that provide clients with world-class quality products.

VestelKom factory located in free trade zone of Izmir, has a special R&D team for manufacturing and testing batteries and EV Chargers, which is also exporting these goods to Europe with zero customs tax.

Vestel has proven its success in product design by receiving the most prestigious design awards every year from well-known industrial design organizations for a variety of products.

Vestel Trade, the company responsible for the marketing and sales of Vestel products overseas, exports 75% of its production under leading Japanese and European brands to 160+ countries.

Vestel appeals to different consumer tastes in 160+ countries with its wide range of products, which reflects its competencies in technological development, design and product customization. Accounting for 90% of Turkey's TV exports and 35% of the nation's white goods exports, Vestel has been an unwavering export leader in the Turkish electronics sector for the past 25 years.

For a sustainable future and transition to an economy based on net zero emissions, Vestel triggers transformation across the entire value chain. Leveraging the power of Industry 4.0 and automation to support the reduction of energy consumption through operational improvements and innovative products, Vestel implements circular models to improve resource efficiency in production and reduce our environmental impact from products.

Vestel aims to reach net zero emissions by 2050, first in its own operations and then in its entire value chain. Vestel is working on decarbonization plan as part of its commitment to set Science Based Targets (SBTi).

Features

>
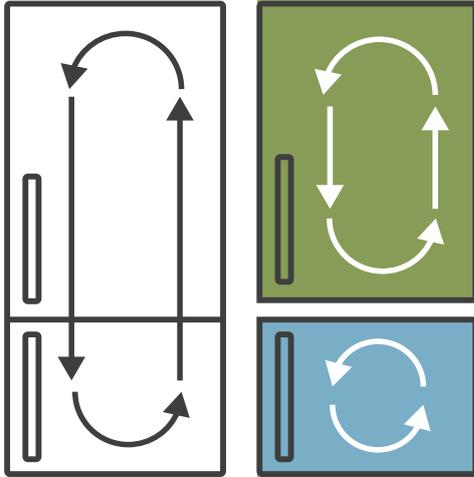

NoFrost Multicooling

On the contrary with conventional technology, NoFrost MultiCooling technology includes two independent air circulation with two separate fans and evaporators. Since there is no transfer of cold air between fridge and freezer cabinets, NoFrost MultiCooling provides extra freshness with optimum humidity levels in each compartment, prevents odor mixing, and keeps flavor of foods.

Freezer Shield

Conventional refrigerator appliances are able to work at a minimum ambient temparetaure of 10˚C. However, with the new Freezer Shield Tech, Vestel appliances can work even if the ambient temperature is as low as -15˚C, which makes it possible to place the appliances in closed locations such as the garage.

Less Frost

Thanks to the wrap around evaporator, LessFrost technology offers more efficient cooling, less manual defrost requirement, and more flexible storage room.

FRESHNESS TECHNOLOGIES

>

PureBeam+

The Purebeam+ Technology at the top of the fridge includes a UVC LED light source and a carbon filter. While the filter absorbs bad odors, UVC LED breaks down bacteria and viruses on the filter surface into harmless substances. Purebeam+ Technology effectively reduces volatile organic compounds formed by the spoilage of food in the refrigerator. The quality of the air in the refrigerator improves and is always kept clean.

Vacuum Bag

Prolongs the shelf life of foods and keeps deli products fresh up to 8 times longer.* Increases life of food by removing air. Prevents the occurrence of unpleasant odours.

*Tested and certified by Third Party Laboratory.
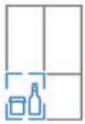

FermentStore

FermentStore helps customers take homemade food to a new level; allowing them to join the growing trend towards fermented foodstuffs and helping them enjoy the known health benefits. As well as being tasty and appealing, fermented foods are known to be rich in probiotics which help restore balance in the stomach. In turn this aids digestion and boosts the immune system. The FermentStore feature allows users to create and store seven different types of food and beverage: yoghurt, kefir, bread dough, wine, beer, vinegar and pickles, which all can be fermented and kept with ease. After the fermentation process, the results can be chilled and stored in the optimum conditions.

DuoMode

Technology that allows the freezer to be set as a cooler for more refrigerator volume in line with the needs of the consumers, to be used as a cooler or freezer, and to be completely closed when not needed.

Convert Zone

Using the compartment as an ideal storage area for fruit and vegetables when the flap is closed, and for meat products when it is open, with its flap feature.

VitaMod

Thanks to a special light source close to the natural spectrum of sunlight, VitaMod ensures that fruits and vegetables stored in the refrigerator continue their natural ripening process, thus preserving their nutritional values at higher levels.

*Tested and certified by Third Party Laboratory.

Humidity Controlled Crisper

Thanks to air channels and special filter, humidity level can be adjusted precisely to keep your fruits and vegetables fresh and crisp.

Chill Zone

Ensures that the food inside is preserved at ideal temperature of around 0 °C. The frozen meat or fish can also be kept in this compartment for proper thawing before consuming. Chill Zone also ensures that your meat & fish stays fresh for while keeping out unwanted odour.

UltraFresh Technology

UltraFresh technology helps reducing unpleasant odors by absorbing ethylene gas (a volatile organic compound released naturally from fresh foods) from the crisper.

�ⁿ V-Lift

With the adjustable height mechanism, height of bottle shelf can be maximized for higher bottles or can be reduced to save space for the dairy shelf. Position of rack can be set to **6** different height.

⇄ V-Shelf

Provides more flexible storage room and higher shelf space thanks to the two-part shelf mechanism sliding on each other.

Door Reversible

Depending on the location of your refrigerator, you can adjust door opening direction thanks to the reversible door feature.

Zero Clearance

You can place your refrigerator next to the wall or cabinets and the door can be opened easily without need of any additional space at **90˚.**

Water Dispenser

Offers quick and practical cold water access, and ergonomic use with **2** liter reservoir. Easy to replenish water

Ice Slide

Provides convenient storage spaces with a simple movement. The slide icematic ensures flexible storage and max capacity anytime you need.
